Get the Result in POST Method format in the

Callback URL Like:

Success

```
("status"=>"Success","transaction_id"=>"12345687","paid_amount"=>"36.22")
```

Declined

```
("status"=>"Declined","transaction_id"=>"12345687","paid_amount"=>"36.22","response"=>"authentication failed")
```

For example:

https://trieyepay.com/test/success.php?transaction_id=12345687&paid_amount=1&status=Success

Important Notice

Best Practices for Transactions	
Don't	Do's
Use Dummy Customer data for any transactions	Use actual customer data for all transactions
Make UPI payment above INR 45000 in a single transaction	Make UPI payment below INR 45000 in a single transaction
Make Netbanking Payment above INR 80000 in a single transaction	Make net banking payment below INR 80000 in a single transaction
Keep trying when experiencing transaction failure	Wait for some time and try again
Attempt more than twice when transaction is failed	Attempt further transactions only when issue is resolved
Use non-Indian mobile numbers	Use Indian mobile numbers for all transactions
Test with higher amounts & spike up the volume in a single shot	Test with minimal amounts & increase gradually
Payment Method	Safe limits per transaction
Wallets	Under INR 25,000
UPI	Under INR 45,000
Net Banking	Under INR 80,000
Safe transaction practices are the ones where you do it as an usual customer would do. Anything beyond that is going to trigger risk both at PSP and bank levels.
