Frequently asked questions

Your energy usage is calculated from your gas consumption using a standard industry formula:

Units consumed (Cubic Metres m³)
x 1.02264 (volume correction for temperature and pressure)
x calorific value (energy content of each m³/ ft³ of gas)
/ 3.6 (convert from joules)
= energy usage (in kWh)

Paying for your energy

We aim to keep things simple. That's why we believe Direct Debit is the best way to pay for your energy. It's quick, easy and hassle free. We review your direct debit regularly to make sure that it is set at the right amount to cover your consumption. We will tell you in advance when each payment is due to be made or if we need to make a change, so you remain in control. Remember, we pay 3% interest on any surplus credit left in your account after every monthly statement. To find out more about our Direct Debit policy visit www.igloo.energy/page/faqs.
